

Datasheet of IC Cards

Specifications:

Chip: Mifare 1 F08

Storage capacity: 1K bit, 16 partitions, two sets of passwords per partition, 18 bit internal code

Working frequency: 13.56MHz, high frequency, PVC

Communication speed: 106KBoud

Reading and writing distance: 2.5-10CM

Reading and writing time: 1-2MS

Working temperature: -20 °C -85 °C

Scratching frequency:>100000 times

Data retention:>10 years

Specification: 0.87 x 85.5 x 54/mm 0.76mm

Packaging material: PVC, 0.13 copper coins

Packaging process: Ultrasonic automatic wire planting/automatic touch welding

Protocol production standards: ISO 14443, ISO 10536
