

Datasheet of RFID Cards (125KHZ)

Specifications:

Type: TK4100 inductive ID card

Chip: Taiwan 4100 COB

Working frequency: 125HZ

Sensing distance: 2-15cm

Size: ISO standard card/thick card/various special-shaped cards

Packaging material: PVC, ABS

Packaging process: lamination, automatic pasting, ultrasonic packaging

Number: continuous number spraying

Typical applications: attendance system, access control system, identity recognition, low-frequency tag card, etc.
